GROUP PROJECT RUBRIC

Criteria	Excellent	Good	Satisfactory	Poor	Marks
Introduction to AI Technology (20 marks)	Provides a comprehensive and insightful explanation of the selected AI technology, including its background, purpose, significance, and relevance as a recent AI development. Clearly identifies the associated AI application domain.	Clear explanation with minor omissions. Demonstrates good understanding of the technology and its relevance.	Basic explanation with limited details and weak justification.	Incomplete, unclear, or inaccurate explanation. Major components missing.	**/20**
	16-20	11-15	6-10	0-5	
Machine Learning Concepts and Technologies Used (30 marks)	Thorough and accurate analysis of machine learning concepts, system workflow, and technologies used. Demonstrates excellent understanding using appropriate terminology and examples.	Good explanation with minor conceptual gaps. Most concepts are explained correctly.	Basic understanding shown but lacks depth, clarity, or accuracy in several areas.	Weak, inaccurate, or incomplete discussion of machine learning concepts and technologies.	**/30**
	26-30	20-25	10-19	0-9	
Applications, Benefits, Challenges and Ethical Issues (25 marks)	Comprehensive discussion supported by relevant examples. Clearly explains benefits, challenges, limitations, and ethical considerations.	Good discussion with relevant examples and adequate analysis of challenges and ethics.	Limited discussion with minimal examples and superficial analysis.	Very limited or irrelevant discussion. Lacks analysis and supporting examples	**/25**
	21-25	16-20	8-15	0-7	
Recent Advancements and Future Development (15 marks)	Critically analyzes at least two recent advancements and provides well-supported discussion of future opportunities, improvements, and societal impact.	Recent advancements identified and discussed adequately with reasonable future insights.	Advancements mentioned but discussion lacks depth, relevance, or supporting evidence.	Missing, inaccurate, or poorly explained advancements and future developments.	**/15**
	13–15	10–12	6–9	0-5	
Conclusion and Group Reflection (5 marks)	Strong synthesis of key findings and thoughtful reflection demonstrating deep understanding of AI and machine learning developments.	Clear conclusion and reflection with minor limitations.	Basic conclusion and reflection with limited insight.	Weak, unclear, or missing conclusion and reflection.	**/5**
	5	4	2-3	0-1	
References and Academic Writing (5 marks)	Uses at least five recent and credible academic sources. APA 7th Edition formatting is accurate and consistent. Report is well-organized, professional, and free from major language errors.	Minor citation, formatting, or language errors.	Several citation, formatting, or language errors.	Poor referencing, insufficient sources, or weak academic writing.	**/5**
