Final Year Project Assignment

Alice - Version 1

1.0 Project Introduction

Question: Describe the background of the proposed system.

Answer: The proposed system is a web-based platform for managing student group assignments. It allows students to work on assignments and helps lecturers view their work.

1.1 Problem Statement

Question: State the main problem addressed by the system.

Answer: Students sometimes have problems when completing group assignments because group work can be difficult to manage.

1.2 Project Objectives

Question: State three objectives of the project.

Answer: 1. To manage group assignments.
2. To help students submit their work.

1.3 Project Scope

Question: Describe the scope of the proposed system.

Answer: The system is used by students to manage assignments and upload files.
