Mobile Application Assignment

Ray - Version 2

1.0 Introduction

Question: Explain the purpose of the mobile application.

Answer: The application is a student task planner that helps students organize academic tasks and view upcoming deadlines.

1.1 Target User

Question: Identify the target users of the application.

Answer: The target users are college and university students who need to manage assignments and study tasks.

1.2 Problem

Question: State the problem solved by the application.

Answer: Students may forget assignment deadlines or have difficulty keeping academic tasks organized in one place.

1.3 Objective

Question: State the main objective of the application.

Answer: The main objective is to help students organize tasks and reduce missed deadlines.

2.0 User Interface

Question: Design a simple interface for the application.

Answer: The interface contains a home screen, task list, Add Task button and a simple bottom navigation bar.

2.1 Navigation

Question: Describe the application navigation.

Answer: A bottom navigation bar allows users to move between Home and Tasks. The Add Task button opens the task form.
