Final Year Project (FYP)

1.0 Project Introduction

Describe the background of the proposed system.

1.1 Problem Statement

State the main problem addressed by the system.

1.2 Project Objectives

State three objectives of the project.

1.3 Project Scope

Describe the scope of the proposed system.

2.0 System Analysis

Identify the target users of the system.

2.1 User Requirements

State three user requirements.

2.2 System Requirements

State three system requirements.

2.3 Existing Problem

Describe one limitation of the current method.

3.0 System Development

State the methodology used to develop the system.

3.1 System Features

Describe three main features of the system.

3.2 Testing

State one testing method used for the system.

3.3 Future Work

Suggest one future improvement for the system.
